

BOIL WATER NOTIFICATION

JANUARY 13,2025

TO: Customers of 439 Water Supply Corporation who are located exclusively on FM439 on North and South sides, west from Bowles Ranch Road to Nolanville, TX.

If you are a customer located **on FM439 on North and South sides, west from Bowles Ranch Road to Nolanville, TX.** and experienced reduced pressure or no water at all, please boil the water prior to using for drinking, cooking, or making ice.

Due to reduced pressure, the Texas Commission on Environmental Quality (TCEQ) has required our water system, 439 WSC PWS ID #0140076, to notify customers in the affected area of the need to boil their water prior to consumption.

To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking, and making ice should be boiled and cooled prior to use. The water should be brought to a vigorous, rolling boil and then boiled for two minutes. In lieu of boiling, you may purchase bottled water or obtain water from some other suitable source.

When it is no longer necessary to boil the water, the water system officials will notify you that the water is safe for consumption. Instructions to discontinue boiling will be issued in the same manner as this notice.

If you have questions concerning this matter, you may contact Larry Zehr at (254) 933-2133. We apologize for the inconvenience.
