March 30, 2026

Members of 439 Water Supply Corporation:

**Our regional water planning authority has instituted a Stage 1 Drought Contingency effective immediately.**

In accordance with our DROUGHT CONTINGENCY PLAN (STAGE 1), we are requesting that our customers be mindful of ways to conserve water through non-essential water use and comply with our **Stage 1 Response** restriction listed below. **Our goal is to achieve 5 percent reduction in total water use.**

1. Members are requested to voluntarily limit the irrigation of landscaped areas to **Sundays and Thursdays** for customers with a street address ending in an **even number (0, 2, 4, 6 or 8)**, and **Saturdays and Wednesdays** for water customers with a street address ending in an **odd number (1, 3, 5, 7 or 9)**, and to irrigate landscapes only between the hours of **12:00 midnight and 10:00 a.m. and 8:00 p.m. to 12:00 midnight** on designated watering days.
2. Members are requested to practice water conservation and to minimize or discontinue water use for non-essential purposes:
  - a) irrigation of landscape areas, including parks, athletic fields, and golf courses, except otherwise provided under this Plan;
  - b) Use of water to wash any motor vehicle, motorbike, boat, trailer, airplane, or other vehicle;
  - c) use of water to wash down any sidewalks, walkways, driveways, parking lots, tennis court, or other hard-surfaced areas;
  - d) use of water to wash down buildings or structures for purposes other than immediate fire protection;
  - e) flushing gutters or permitting water to run or accumulate in any gutter or street;
  - f) use of water to fill, refill, or add to any indoor or outdoor swimming pools or jacuzzi-type pools;
  - g) use of water in a fountain or pond for aesthetic or scenic purposes except if necessary to support aquatic life;
  - h) failure to repair a controllable leak(s) within a reasonable period after having been given notice directing the repair of such leak(s);
  - i) use of water from hydrants for construction purposes or any other purposes other than firefighting.
3. Please repair all leaks to customer lines as soon as you are aware that a leak exists (including running toilets, leaky faucets and dripping hoses). In addition, please notify 439 Water Supply of any suspected leaks in corporate transmission lines.

We do not anticipate any problems with the delivery of water to our customers this summer; however, the involvement of our customers in the voluntary conservation of water is mandated by the current drought-watch condition initiated by the Brazos River Authority. Please review additional information on our Drought Contingency Plan on our website at [https://439watersupply.com/documents/1078/DROUGHT\\_CONTINGENCY\\_PLAN\\_439\\_11-15-2023.pdf](https://439watersupply.com/documents/1078/DROUGHT_CONTINGENCY_PLAN_439_11-15-2023.pdf)

Your participation is encouraged and appreciated.

**439 WATER SUPPLY CORPORATION  
BOARD OF DIRECTORS**
