439 WATER SUPPLY CORPORATION

APPLICATION FOR MEMBERSHIP AND SERVICE AGREEMENT

by and between **439 WATER SUPPLY CORPORATION**, a corporation organized under the laws of the State of Texas, hereinafter called the **CORPORATION**, and the individual, partnership or corporation whose signature appears at the end of this document, hereinafter called **MEMBER**, witnesseth:

The Corporation agrees to sell and deliver water to the Member and the Member agrees to purchase and receive water from the Corporation, for domestic purposes unless otherwise specified, in accordance with the By Laws, tariff, and all rules and regulations of the Corporation, as amended from time to time by the Corporation, upon payment of the established MEMBERSHIP FEE, IMPACT FEE, INSTALLATION FEE and any other charges as may be specified in the Tariff. All charges are NON-REFUNDABLE.

The Member shall pay the Corporation for service hereunder at the rates and upon the terms and conditions set forth in the rate schedule adopted from time to time by the Corporation's Board of Directors. The Board of Directors shall have the authority to render any membership of any Member null and void in the event of non-payment of any water charges or assessments owing by said Member within thirty (30) days after demand for payment by mail. In the event of the sale of the property by Member to another party, Member shall have the option to transfer his membership to the new owner, provided all indebtedness due the Corporation has been paid by Member, and upon approval of the transfer by the Board of Directors, and upon filing of a duly executed and signed Membership Transfer Form, including the applicable Membership Transfer Fee, with the Corporation office. If the membership is not transferred and the property is sold, the membership becomes null and void. In the event of a repossession of the property, the Corporation may reassign the membership to the repossessioning agent. If the Member rents the property to another party, the Member continues to assume ultimate responsibility for payment of any and all charges against the meter. The Corporation strongly recommends that the Member collect and holds a deposit from any renter in sufficient amount to cover any outstanding charges that might be left unpaid by the renter. The Corporation does not collect a deposit and will hold Member responsible for any charges against Member's meter, or damages to Corporation property.

All water shall be metered by meters to be furnished and installed and owned by Corporation. In the event the total water supply shall be insufficient to meet all the needs of the Members, or in the event there is a shortage of water, the Corporation may prorate the water available among the various Members on such basis as is deemed equitable by the Board of Directors, and may also prescribe a schedule of hours covering use of water for garden purposes by Members and require adherence thereto or prohibit use of water for outdoor purposes; provided that, if at any time the total water supply shall be insufficient to meet all the needs of all the Members, the Corporation must first satisfy all the needs of all Members for domestic purposes, then for livestock purposes, before supplying any water for garden or outdoor purposes.

The Member shall install, at his own expense, a service line from the meter to the point of use, with a cut-off valve on the customer side of the meter. The Member shall hold the Corporation harmless from any and all claims or demands to real or personal property occurring from the point Member ties on to the Corporation meter to the final destination of the line installed by Member. The Member agrees, as a condition of membership, to grant to the Corporation an easement of right-of-way for the purpose of installing, maintaining and operating such pipelines, meters, valves and any other equipment which may be deemed necessary for the Corporation, on such form as is required by the Corporation.

The Corporation shall have the right to locate a water service meter and the pipe necessary to connect the meter on the property of the Member at a point to be chosen by the Corporation, and shall have access to its property at all reasonable times for any purposes connected with or in the furtherance of its business operations, including the right to check for illegal connections or unsafe plumbing practices or cross-connections, in compliance with the requirements of the Texas Department of Health's "Rules and Regulations for Public Water Systems." **METERS MUST NOT BE FENCED OR AN ACCESS GATE MUST BE PROVIDED AT THE SITE OF THE METER.** On discontinuance of service, Corporation shall have the right to remove any of its property from Member's premises, and Corporation retains the full right of egress and regress.

These inspections shall be conducted by the water system or its designated agent prior to initiating new water service; or when there is reason to believe that cross-connections or other potential contamination hazards exist; or after any major changes to the private water distribution facilities. The inspections shall be conducted during the water system's normal business hours.
 - C. The water system shall notify the member/customer in writing of any cross-connection or other potential contamination hazard which has been identified during the initial inspection or the periodic re-inspection.

Public Notice for Changing from Free Chlorine to Chloramines

On May 8, 2014, the 439 Water Supply Corporation will be changing the disinfectant that we use from chlorine to chloramines. This change is intended to benefit our customers by reducing the levels of disinfection byproducts (DBPs) in the system, while still providing protection from waterborne disease.

However, the change to chloramines can cause problems to persons dependent on dialysis machines. A condition known as hemolytic anemia can occur if the disinfectant is not completely removed from the water that is used for the dialysate. Consequently, the pretreatment scheme used for dialysis units must include some means, such as charcoal filter, for removing the chloramine prior to this date. Medical facilities should also determine if additional precautions are required for other medical equipment.

In addition, chloraminated water may be toxic to fish. If you have a fish tank, please make sure that the chemicals or filters that you are using are designed for use in water that has been treated with chloramines. You may also need to change the type of filter that you use for fish tanks.
